

Island Filter Hood FN-DB60 with MZ

Double Box Island Single Row Island Appliances

General Description

The double island filter hood is used on single row island cooking equipment. The hood is ceiling hung with a recommended mounting height of 6'6'' (1981 mm) from the finished floor. The hood has a full-length "V" bank filter arrangement centered in the canopy width. The baffle filters on each side of the "V" can be sized for unequal exhaust air volumes. The hood is finished in a No. 4 stainless steel finish on all exposed sides. The double box canopy can be tapered to 12" (305 mm) at the front. The filter hood is available with fluorescent or incandescent lights.

The tempered makeup air is discharged down and/or horizontal, through perforated stainless steel panel located forward of the filter hood. The MZ plenums are shipped loose.

Efficiency

The hood is equipped with high efficiency UL/ULC listed baffle grease filters. The exhaust air accelerates through multiple turns within the baffle filter. Centrifugal forces causes grease dirt and lint to deposit on the baffles. The liquefied grease drains down the baffles, along the grease trough, and into a grease cup. **Exhaust and Supply**

The total exhaust required to properly ventilate a commercial kitchen is directly related to the type of cooking equipment under the ventilator. An exhaust flow rate between 300 and 700 CFM/ft (465 and 1085 l/s/m) is required for most hoods. Heated fresh air is discharged out the front of the hood canopy for MP and MG types. Fresh air volume of 80% of the total exhaust is recommended for heated makeup air systems.

Model FN-DB with MZ

| | Typical Exhaust and Supply Air Flow Rate for Heated Makeup Air MC types (EFR*) | | | | | | | |
|------------|---|-----------|--------------------------------------|---------------|-------------------------|-------------|--------------------------------------|---------------|
| Ventilator | Exhaust @ 500 CFM/ft | | Supply @ 400 CFM/ft (80% exhaust) | | Exhaust @ 600 CFM/ft | | Supply @ 420 CFM/ft (70% exhaust) | |
| Length | Exhaust | Exhaust | Supply | Supply Duct | Exhaust | Exhaust | Supply | Supply duct |
| (ft) | Volume | Duct Size | Volume | Size | Volume | Duct Size | Volume | Size |
| | CFM | in x in | CFM | in x in | CFM | in x in | CFM | in x in |

| 14.0 | 7000 | 16 x 39.5 | 5600 | 8 @ 10 x 12 | 8400 | 2 @ 10 x 37 | 5880 | 8 @ 10 x 13 |

Engineering Data

*For flow Rates not shown above refer to the Ventilator Engineering Manual for Exhaust and Supply Volumes

| Exhaust Flow Rate CFM/ft | Exhaust Static Pressure (in W.C.) |
|-----------------------------|--------------------------------------|
| 400 | 0.35 |
| 500 | 0.45 |
| 600 | 0.66 |
| Supply Air Rate | Supply static Pressure ("W.C.) |
| MC | 0.20 |

Notes:

• Exhaust duct can be located anywhere along length of the filter hood.

For lengths greater than 14' (4270 mm) join multiple sections together.

Spring Air Systems Model No. FN-DB60 with MZ Hood Specification

The filter hood shall be a Spring Air Systems model no. FN-DB60 with MZ, double box canopy, high efficiency, filter hood, with down discharge make up air plenum, The MC plenums ship loose with the hood. UL/ULC listed, and built in accordance with the NFPA-96. The unit casing shall be a minimum 18 GA. Stainless steel with all exposed sides no. 4 finish. The filter hood shall include UL/ULC listed baffle grease filters mounted in an integral stainless steel rack inclined at 45 degrees. The filter rack shall include a full-length stainless steel grease gutter and grease cup.

The heated makeup air discharges down through stainless steel perforated panels located on the front and back of the hood.

The sheet metal contractor shall supply an access door on the duct above the damper for inspection. The hood shall have incandescent/fluorescent lights evenly spaced along the length of the hood.
